

Review Reactivation System

System Documentation

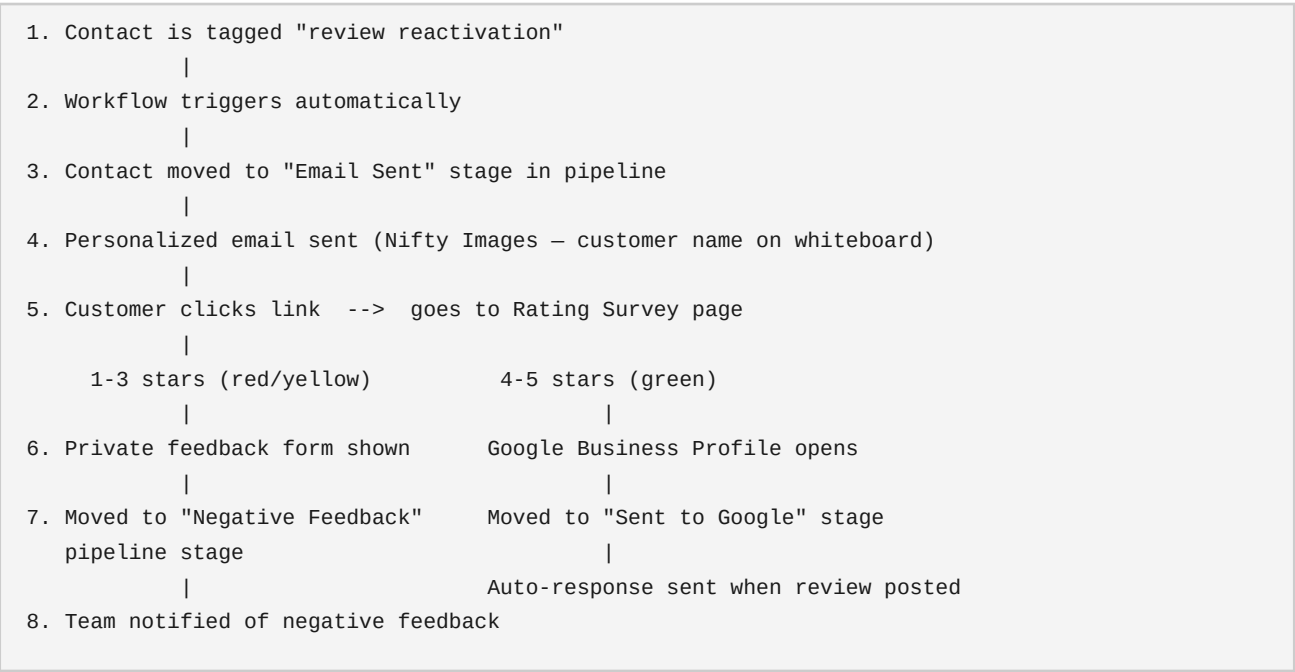

Field	Detail
Prepared for	J-C Masithela
Prepared by	Dawn Solomon, GHL Automation Specialist
Date	May 12, 2026
Status	Domain Warm-Up In Progress — Not Yet Live

This document covers the full Review Reactivation system — pipeline stages, workflow logic, setup, and domain warm-up status. Do not publish the workflow or send to actual contacts until confirmed by GHL.

1. Overview

The Review Reactivation System sends personalized email campaigns to past clients requesting a review. It uses a filtering system to route positive responses (4-5 stars) to Google Business Profile and negative responses (1-3 stars) to a private feedback form — preventing low-star reviews from appearing publicly on Google.

2. Full System Flow

3. Pipeline Stages — Reviews Reactivation

Stage	Description
To Contact	Fresh contacts not yet messaged
Email Sent	Review request email has been sent to the contact
Opened / No Response	Email opened but no action taken by the contact
Responded	Contact clicked the rating link in the email
Negative Feedback	1-3 star rating — contact routed to private feedback form
Sent to Google	4-5 star rating — contact redirected to Google Business Profile
Google Review Left	Contact successfully left a review on Google
Auto-Response Sent	Automated reply sent to the posted Google review

4. Workflow — Reviews Reactivation Campaign

Step	Action
Trigger	Contact Tag Added: "review reactivation"
Step 1	Create/Update Opportunity !' Move to "Email Sent" pipeline stage
Step 2	Send Email: "We'd love your feedback" with Nifty Images personalization
Step 3	Wait: Trigger Link Clicked — Google Review Link (Timeout: 3 days)
Step 4	If/Else branch based on survey star rating result
Branch A — 4-5 stars	Move to "Sent to Google" stage !' Send Google Review link
Branch B — 1-3 stars	Move to "Negative Feedback" stage !' Send private feedback form
No Response (timeout)	Follow-up email sent after 3-day timeout expires

5. Custom Values Used

Custom Value Name	GHL Key	Purpose
Google Review Link	{{custom_values.google_review_link}}	Google Business Profile review URL
Nifty Personalized Image	{{custom_values.text_1_image_link}}	Personalized image — customer name on whiteboard
Business Owner Name	{{custom_values.business_owner_name}}	Used in email body copy
Business Name	{{custom_values.business_name}}	Used in email footer
Email Sending Domain	{{custom_values.9_email_sending_subdomain...}}	Warmed-up domain for email delivery

6. Rating Survey

- Location: Sites !' Surveys !' Review Rating Survey
- Question type: Star Rating (1 to 5 stars)
- Redirect logic based on rating:
 - 1-3 stars !' Private feedback form (not sent to Google)
 - 4-5 stars !' Google Business Profile review page
- Survey link is the click target of the Nifty Images personalized image in the email

7. Email Template

Field	Value
Subject Line	{{contact.first_name}}, we'd love your feedback
From Email	Warmed-up domain email (pending GHL propagation approval)
Personalization	Nifty Images — customer first name displayed on whiteboard in image
Call to Action	Customer clicks the Nifty image !' redirected to Rating Survey
Footer	© {{right_now.year}} {{location.name}} — unsubscribe link included

8. Domain Warm-Up Status

Item	Status
Warm-up workflow	Built and running
Test emails	Active — sending to test addresses
Domain propagation	Pending GHL approval
Campaign launch	After domain is cleared by GHL

9. How to Add Contacts to the Campaign

To enroll a contact into the Review Reactivation campaign:

- Go to Contacts in GHL
- Find the contact or import a new list via CSV
- Add the tag: review reactivation
- The workflow triggers automatically — no additional manual steps needed

Note: During the warm-up phase, only add test contacts. Do not tag actual client contacts until domain propagation is confirmed.

10. Important Notes

IMPORTANT — Read Before Proceeding

- Do NOT publish the workflow until domain propagation is fully approved by GHL
- Do NOT send to actual client contacts during warm-up phase — test emails only
- The "06. Counting Review Requests in last 14 Days" workflow is DO NOT TOUCH
- All custom values are stored under the Google Review System folder in GHL
- The Nifty Images personalization requires the contact first name field to be populated
